ABOUT ME

Passionate Web Developer with experience in building responsive and user-friendly web applications using HTML, CSS, JavaScript, PHP, Laravel, MySQL, and WordPress. Interested in AI-based systems and modern web solutions, with a Final Year Project focused on intelligent job counselling using AI recommendation techniques. Quick learner with strong problem-solving and creativity skills.

EDUCATION & TRAINING

[19/08/2022 - 19/05/2026]

BS Computer Science

University of Education

City: Jauharabad, Punjab | **Country:** Pakistan | **Final grade:** CGPA: 3.14/ 4.0

[07/07/2019 - 07/07/2021]

Intermediate in Computer Science (Pre-Engineering)

District Public School and Inter College

PROJECTS

Portfolio Website (HTML · CSS · JavaScript)

Developed a responsive personal portfolio website to showcase skills, projects, and experience. Designed a clean and modern UI with smooth navigation and mobile-friendly layout.

Project Management System (HTML · CSS · JavaScript · PHP · MySQL)

Developed a web-based project management system to help users organize and track tasks efficiently. The system allows creating projects, adding tasks, updating status, and managing deadlines.

Task Management System (HTML · CSS · JavaScript · PHP · MySQL)

Developed a task management system to help users create, update, and track daily tasks efficiently. The system allows users to manage task status and organize their work in a simple dashboard.

C World Website (HTML · CSS · JavaScript)

Developed a responsive company website for C World with a modern UI design. Includes multiple sections such as Home, About, Services, and Contact with smooth navigation and mobile-friendly layout.

PoseFit – A Smart Gym Posture Detector

Final Year Project — developed an AI-powered gym posture detection system designed to help users maintain correct exercise form and improve workout performance. The system detects and analyzes body posture during workouts using AI-based smart detection techniques and posture analysis models.

The platform helps users identify incorrect exercise positions and provides posture correction support to reduce the risk of injury and improve exercise accuracy. The system includes user-friendly interfaces, workout monitoring features, and intelligent posture analysis functionality.

Tour & Travel Management System

(HTML · CSS · JavaScript · PHP · MySQL)

Developed a web-based travel management system for handling tour packages, customer bookings, destination details, and travel management with a responsive and user-friendly interface.
